

PRODUCT NAME: Classic Corner Brick Slips

PRODUCT CODE: LCC

What are Corner Brick Slips?

Corner Brick Slips are an 'L' shaped brick slip that are designed to fit perfectly around corners. Not only are they used around standard wall corners, but they can also be used for detailed brick work features such as pillars, archways, windows, doorframes and more.

Why Choose Brick Slips?

Choosing Brick Slips to complete your brick work piece is the better option than cutting full size brick slip or by trying to join two full size bricks slips together in the corner.

The Benefits:

- Smooth polished finish
- Natural look
- Reduce installation time
- Save labour costs
